

Dr. Jermey N. A. Matthews is Associate Editor at the American Institute of Physics (AIP) College Park, Maryland, USA, and a news writer and editor for AIP's *Physics Today* magazine. Originally from Guyana, he grew up in Tortola, British Virgin Islands and in the mid-western US states of Indiana and Michigan. He completed his B.S. in Chemistry at Columbia Union College in Maryland, and his M.S. and PhD in Chemical Engineering at the University of Maryland, College Park. His master's work was on the synthesis of silica microgels and his PhD research was on the thermodynamics of the biopolymer and muscle protein, actin. Before joining AIP, Dr. Matthews also conducted research on water filtration membranes as a postdoctoral associate at Howard University in Washington, DC. He has written several articles on industrial research, emerging technologies, and science and science education efforts in developing countries and among underrepresented populations.
